EMS CDC – presentation

The Committee for Developing Countries is a committee of the European Mathematical Society (EMS). It consists of about ten members and ten associate members, most of whom are engaged in development work in their capacity as heads of various such projects. We aim to assist developing countries in all possible ways.

Emerging Regional Centres of Excellence (ERCE)

Among the emerging economical regions there are very good centres which can train mathematicians to the Masters level and higher.

EMS selects, endorses and helps a number of such centres to offer training to M.Sc. level to students from less developed countries in their region.
